Rabies is a virus that attacks the central nervous system. It is transmitted from infected mammals to humans and is fatal once symptoms appear. Symptoms of rabies include unusual behavior, irritability, headache, fever, inability to eat or drink, balance problems, circling, seizures, coma, and, finally, death. All warm-blooded mammals, including humans, are susceptible to rabies.

In 2018, the Mobile County Health Department investigated 579 animal bite cases. To learn more about our program, visit http://mchd.org, go to “Services,” find “Disease Control” and go to “Rabies Control.”
