Dr. Bernard H. Eichold II, Health Officer for the Mobile County Health Department, advises area residents to take precautions when encountering any standing water that may have accumulated because of these overflows. Those who have come into direct contact with untreated sewage are advised to wash their hands and clothing thoroughly.

Area residents should take precautions when using Dog River, Three Mile Creek and Eslava Creek for recreational purposes because of the overflow. All seafood harvested in this general area should be thoroughly cooked before eating. People should wash hands after cleaning seafood and before preparing food.
